My obstacle course

Name _____

Moving

Say the steps out loud, then go! Colour in each number when you've done it.

1. Climb over the cushions
2. Crawl under the blanket tunnel
3. Walk along the line
4. Jump to the end!

Draw your course!

Next time I'll add...

For grown-ups: build it from what's at home: cushions, chairs, a blanket over two chairs and a line of masking tape. Clear the space first. Let your child say the steps before they start, then let them design the next course themselves.
